

Life Sciences and Healthcare (LSHC)

Evalueserve's Life Sciences and Healthcare practice offers role- and need-based learnings for enhancing knowledge in the areas of pharmaceuticals, healthcare, and life sciences.

Basic and advanced-level training sessions are offered to new hires. The program, spread over three months, supplement the on-job learnings of new hires with learning interventions. It provides basic understanding of the pharmaceutical and life sciences industries and their various attributes, including competitive environment, market research, health economics, epidemiology research and understanding of analytics in this space.

These programs expose analysts to conceptual learnings on:

- Pharmaceutical Industry
- Company / Product Profiles
- Competitive Benchmarking
- HEOR / Market Access
- Data Analytics, Visualization, and Management

Knowledge sharing sessions are also organized regularly to facilitate information flow across teams.
