Palo Alto Networks is the global cybersecurity leader, known for always challenging the security status quo. Our mission is to protect our way of life in the digital age by preventing successful cyberattacks. This has given us the privilege of safely enabling tens of thousands of organizations and their customers. Our pioneering Security Operating Platform emboldens their digital transformation with continuous innovation that seizes the latest breakthroughs in security, automation, and analytics. By delivering a true platform and empowering a growing ecosystem of change-makers like us, we provide highly effective and innovative cybersecurity across clouds, networks, and mobile devices.

Our platform was built from the ground up for breach prevention, with threat information shared across security functions system-wide, and designed to operate in increasingly mobile, modern networks. By combining network, cloud and endpoint security with advanced threat intelligence in a natively integrated security platform, we safely enable all applications and deliver highly automated, preventive protection against cyberthreats at all stages in the attack lifecycle without compromising performance. Customers benefit from superior security to what legacy or point products provide and realise a better total cost of ownership.

Palo Alto Networks has more than 48,000 customers across 150 countries and the number is growing every day. The company is Gartner’s Enterprise Firewall market leader for the last 6 consecutive years.

About Evalueserve
Evalueserve is a global professional services provider offering research, analytics, and data management services. We are powered by mind+machine - a unique combination of human expertise and best-in-class technologies that use smart algorithms to simplify key tasks. This approach enables us to design and manage processes that can generate and harness insights on a large scale, significantly cutting costs and timescales and helping businesses that partner with us to overtake the competition.

Our pioneering Security Operating Platform emboldens their digital transformation with continuous innovation that seizes the latest breakthroughs in security, automation, and analytics. By delivering a true platform and empowering a growing ecosystem of change-makers like us, we provide highly effective and innovative cybersecurity across clouds, networks, and mobile devices.

“After studying multiple solutions, we shortlisted solutions from Palo Alto Networks to address our security requirement. We could see the extensive knowledge and confidence of Palo Alto Networks team and partner involved as they developed a proof of concept (POC) based on the defined scope and features like a pro.”

Sachin Jain
CIO, Evalueserve

Through special arrangements with the publisher, this Palo Alto Networks® promotional cover wrap has been placed on a limited number of copies of Forbes Asia. It does not constitute an endorsement by Forbes Asia and no endorsement is implied.
Looking to establish strong cyber defence, Evalueserve, a leading provider of proprietary solutions and services for research, analytics and data management to global organisations, was looking for a future-proof security platform that provides visibility, prevention and resilience. They wanted to secure their network by taking a preventive approach in dealing with emerging threats and keen to solve multiple business and operational challenges including:

- Upgrading end-of-life hardware to the latest firewall platform
- Limited visualisation capabilities of the existing firewall
- Protection against known and unknown threats while reducing business risks
- Inefficiencies caused due to the ‘Defence in Depth’ approach
- Reactive approach while dealing with emerging threats
- OEM accountability

The perimeter security device (traditional firewall) at Evalueserve’s Gurgaon office was due for a refresh, and after a detailed assessment and evaluation of multiple technologies from various OEMs, Evalueserve selected Palo Alto Networks® security operating platform which provides protection for today and the future.

"To meet the security challenges of the ever-changing technology landscape in real-time, we decided to go with Palo Alto Networks next-generation firewall that covers all key threats. Furthermore, their firewall operations proved to be easy-to-manage and were of added value to the security team," said Sachin Jain, CIO, Evalueserve. “The detailed Security Lifecycle Review report inclusive of a dashboard came as one of the key benefits, enabling better visibility and decision making. We are happy to say that the visibility inside our network with respect to threats is deeper and clearer than before.”
