

#4 Website Posting(ES004)

Company: Evalueserve Inc.

Location: 421 Fayetteville St. Suite 200, Raleigh, North Carolina 27601

Position Title: Manager – Data Science

Job description:

Partner with clients to understand business problems and design analytical frameworks and algorithms to facilitate better decision making. Build, develop and maintain machine learning models, data models, reporting systems, data automation systems, dashboards and performance metrics that support key business decisions. Design, manage and optimize processes for data intake, validation, mining and engineering as well as modeling, visualization and communication deliverables. Coordinate cross-functional projects using advanced data modeling and analysis techniques to discover insights that will guide strategic decisions and uncover optimization opportunities. Generate revenues by converting pilot projects and manage the quality and timelines of the deliverables. Travel and work at client sites as assigned.

Job requirements:

Requires a Master's degree (or foreign equivalent) in Business Administration, Computer Science, Electrical, Communication, Electronic Engineering or related field plus two (2) years of experience in a related information technology role. Requires minimum three (3) years of experience in the following: Machine learning algorithms; data mining techniques; SQL, SAS, R, and Python; business intelligence frameworks, technologies, and platforms; and relational and non-relational databases. Employer will also accept a Bachelor's (or foreign equivalent) degree plus five (5) years of described experience. Any suitable combination of education, training, or Experience is acceptable. Travel and work at client sites as assigned.
