Why Agile Innovation?

Companies are looking to re-invent their product and tech strategies to develop or acquire new capabilities

Agile innovation strategy aims at maximizing the value generated by Existing technologies, Existing domain capabilities and Existing GTM characteristics

Identify plausible business opportunities

Increasing dynamicity due to **constantly evolving market and changing customer demands** make it necessary for companies to explore whitespaces and translate them into plausible opportunities

Evaluate opportunities and risks

Companies need to assess their competitive position, as well as associated potential risks and growth avenues. In a nutshell, **assess the potential areas to place the bet.**

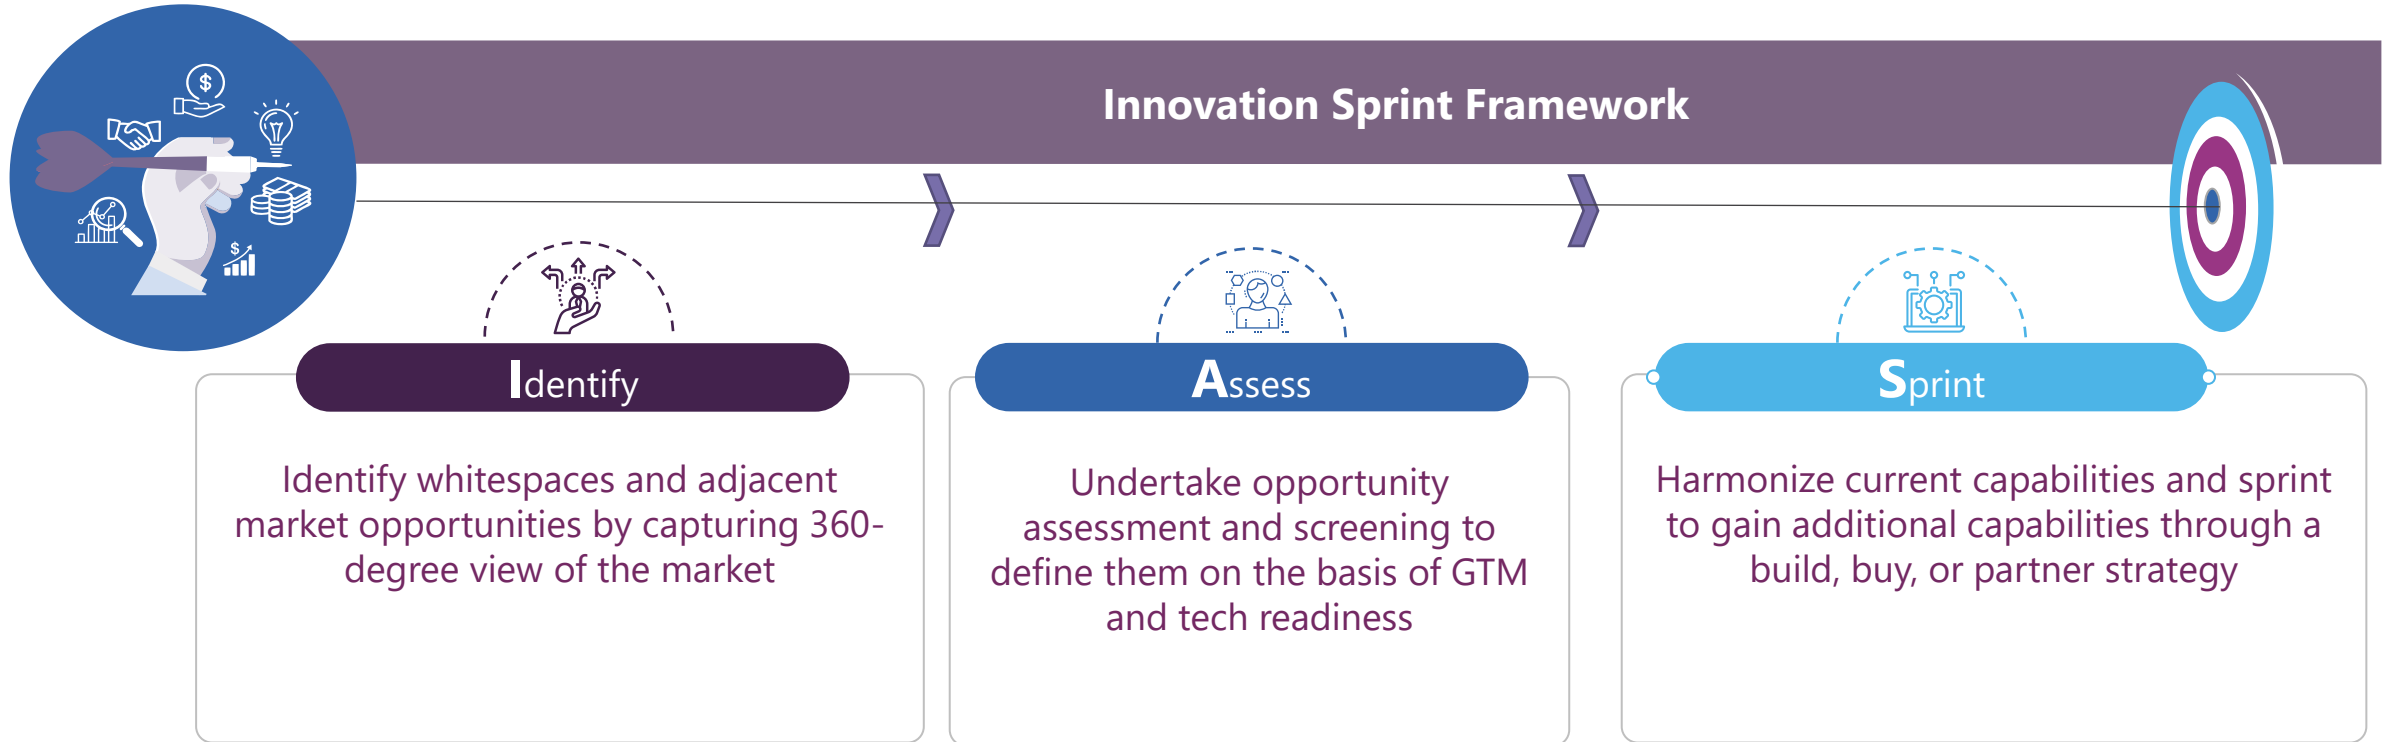

Create the winning blue-print

Companies **need to undertake proactive strategic planning** to achieve their growth objectives. A clear strategy blueprint helps to emerge as a winner

What Evalueserve Offers?

Evalueserve's **Innovation Sprint Framework** helps companies to formulate a clear vision and go-forward plan to leapfrog the competition and sustain the growth

We help maximize impact by integrating insights, innovation, and automation

INSIGHTS • INNOVATION • IMPACT

Scan Market and Competition to Identify Whitespaces and Adjacent Opportunities

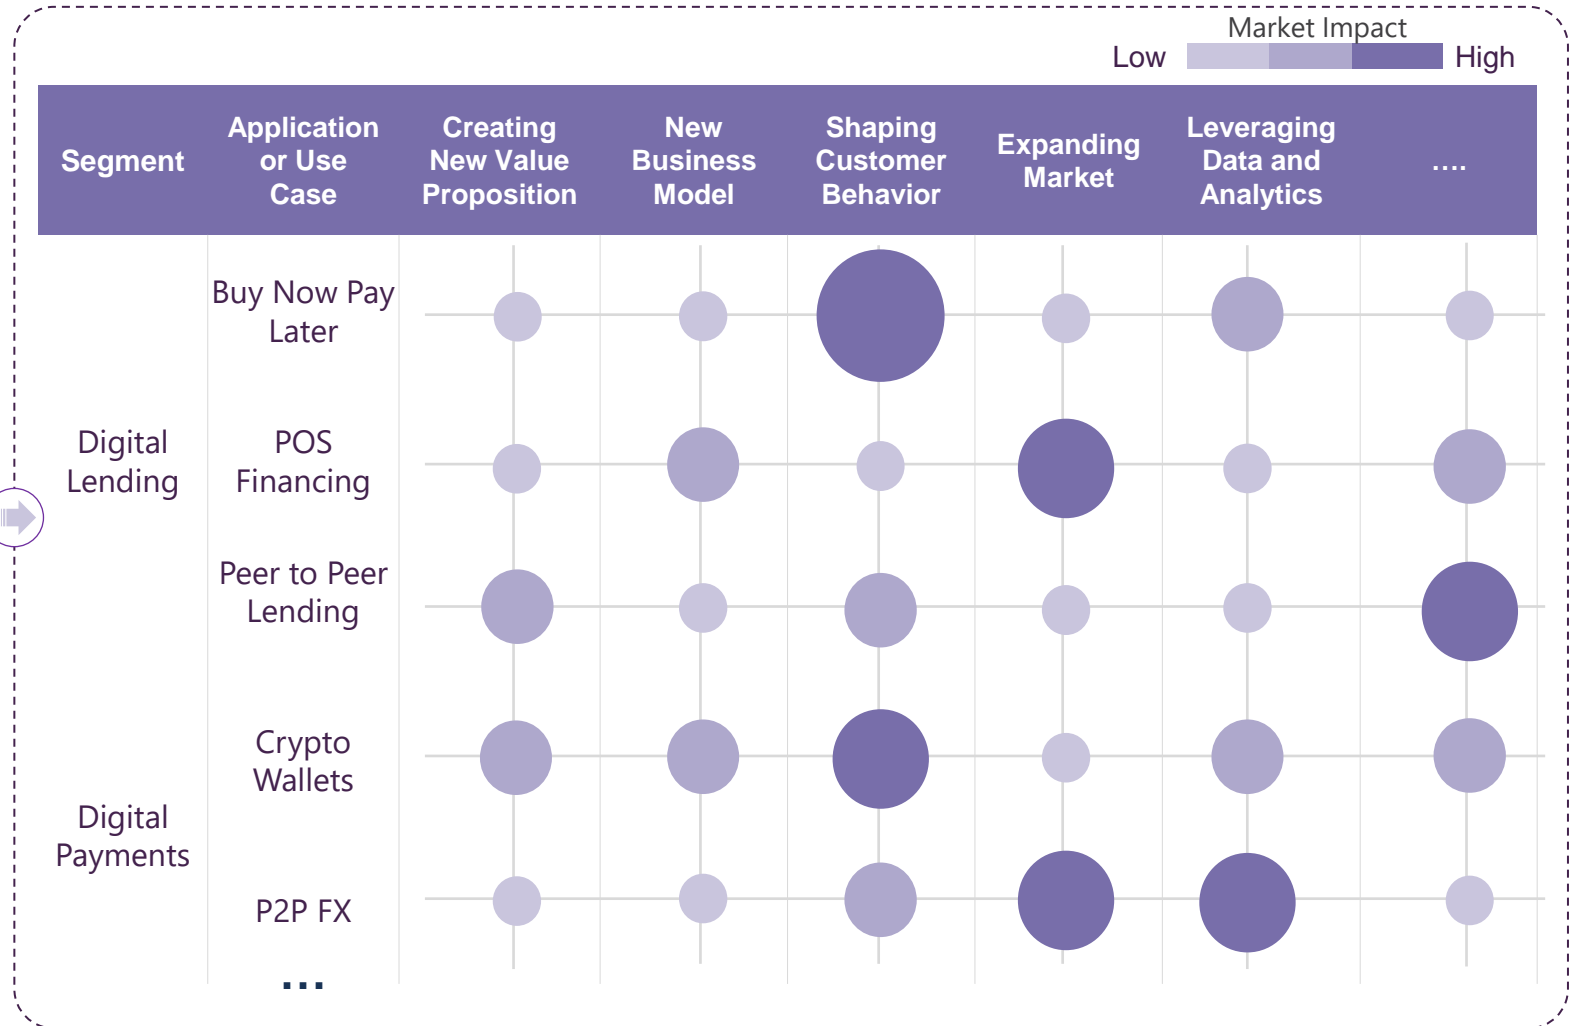

Whitespace Identification

Identify whitespaces by

- Analyzing unmet customer requirements
- Undertaking quantitative and qualitative assessment of disruptive technologies and business trends
- Strategically assessing competitors' and emerging startups' products and services

Strategic Assessment

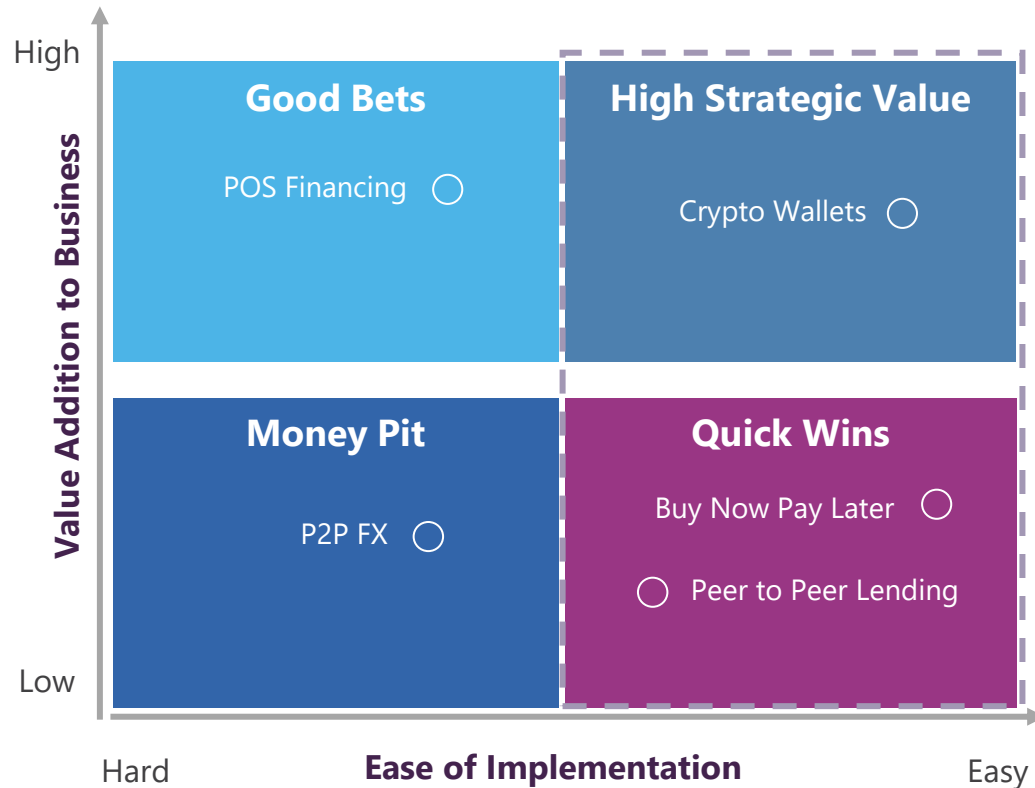

- Assess the impact of emerging skills and tech across strategic business segments
- Assess internal capabilities and go-to-market readiness
- Help companies identify new and emerging business opportunities

Assess and Bucket Business Whitespaces to Identify Impactful and Low-hanging Opportunities

Evalueserve's highly structured assessment model helps organizations to evaluate and prioritize their business objectives to commit resources for efficient execution

Money Pit

Requires sizeable resources to address critical capability gaps but still offers low yield

Good Bets
